

X-SERIES REDBACK (standard & tundra)

Standard version shown with Wizard wing

THE LATEST IN AFFORDABLE AVIATION

Don't underestimate the versatility of the X-Series Redback. Powered by a Rotax 503-DCDI engine it is a very capable two seater trike. You can add the tundra undercarriage option and have the adventures of a lifetime.

When you fly the X-Series Redback you quickly realise that you are getting a lot of fun out of a low cost package. This two seater trike offers pilots ultimate simplicity. It's light weight allows for a higher pilot passenger weight because it has less bells and whistles than our other models.

The Wizard-3 wing has gained an exceptional reputation as an all-rounder. It has short field landing capability and is often used for towing hang gliders, archaeology study, helping to migrate birds or as a workhorse for inspecting fence or pipelines. The Wizard-3 coupled with the X-Series Redback microlight makes for an excellent aerial photography platform, as it offers the pilot and passenger less restricted views than fully faired Airborne microlights.

If your desire is cross country then the top end performance of the X-Series Redback can get you to your destination faster than most wings in it's class. The X-Series Redback is Australian Civil Aviation Safety Authority Approved and tested to 6g positive and 3g negative under strict government control.

FEATURES

- Front wheel drum brake
- Dual Seats
- 44 litre fuel tank
- 276 km (172 miles) range*
- Single person set up
- Available with the Wizard
- X-Series Redback tundra model also available

Power
