

X-SERIES CLASSIC

Shown with Streak 2B wing

THE VETERAN OF THE AIRBORNE RANGE

Based on the Edge X base the X-Series Classic has stood the test of time and is a proven reliable and robust aircraft. Powered by the Rotax 582-DCDI engine, the X-Series Classic offers the comfort of the fibre glass fairing, electric start and oil injection as standard features.

It's smooth aerodynamic lines have been a winner with many of our customers over the years. The fairing offers protection from the elements, the soft sides give you a place to store baggage, and it looks stunning in any of the four available colours.

The X-Series Classic has served customers in various roles; it was used in west Africa for the elephant conservation project and also in Indonesia to help protect the endangered orangutans.

The X-Series Classic utilises the same comfortable seating as all of our models with probably the best back support available on any trike today. The X-Series Classic comes virtually fully optioned with most of the extras you would want flying cross country.

The Airborne X-Series Classic is quality built in accordance with Australian Civil Aviation Authority regulations, that's our guarantee!
